ctx22 **CALC+**

Increases water hardness at values below 175ppm to prevent the corrosion of pool materials.

· Water hardness should be between 175 and 300 ppm

GRANULATED	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	IMMEDIATE		150g /10ppm /10m³

PROPERTIES

Appearance	Solid
Colour	White
Specific mass (20º)	0,85 Kg / cm^3

CHARACTERISTICS

Granulated compound to increase the content of calcium in the water of the swimming pool when it is under 175 ppm. It is essential for ideal water and to avoid damage to materials forming the swimming pool caused by untreated water.

INSTRUCTIONS FOR USE

Water hardness should be between 175 – 300 ppm (CaCO3) and should be checked once a month by means of a test kit.
Pour the necessary dose of product dissolved in water evenly over the swimming pool surface.

DOSAGE

Add 1,5 Kg. of product to increase by 10 ppm the hardness of 100 m.3 of water.

These doses are the ones suggested and can be modified according to the own characteristics of every swimming pool, climate, etc.
